SECTION: GARDENS; Q&A; Pg. GS02

LENGTH: 383 words

HEADLINE: Flowers such as larkspur, poppies help thwart deer

BYLINE: CALGARY HERALD

BODY:

Human hair placed in pantyhose and hung 3 or 4 feet above the ground may keep them away, but replace it regularly, especially after it gets wet.

You can also try hanging bars of strongly scented soap in the same fashion and sprinkling soap chips in your flower beds. Liberally sprinkling bloodmeal on the soil or spraying vegetation with a red pepper and water solution may also deter deer, but will also need to be reapplied after rain or watering.

There are chemicals available to apply to plants which will leave a ...

HEADLINE: Colored mulch improves a green thumb.

BYLINE: Raloff, Janet

BODY:

... equivalent amounts of red, far-red, and photosynthetically active light, the scientists note, the chemical differences between turnips must trace to something else--perhaps the blue light (440 to 460 nm), which reflected most strongly off the blue mulch.

**Similar** taste and chemical analyses of carrots and strawberries grown with different colored **mulches** are now under way.

**Fighting Blight.** Perhaps the least expected attribute of **color** has been its role in countering the ravages of nematodes, parasitic roundworms that burrow into the roots of **plants**, such as tomatoes. A root tumor that develops around each worm serves as a nest for the next generation of nematodes. While these worms usually do not kill their host, the energy they steal to fuel their growth and reproduction can severely diminish a ...

LENGTH: 660 words

HEADLINE: MULCH FROM COCOA SHELLS HAS PLUSES AND MINUSES

BYLINE: Christine Arpe Gang; The Commercial Appeal

... Gurley, owner of Gurley's Azalea Garden, sold some cocoa shell mulch last year but isn't ordering more for next spring.

"I didn't like it all," Gurley said. "It molded and didn't hold its **color**."

Even though Toulaitos likes the cocoa shell **mulch**, he thinks gardeners should rely on materials from their regions for mulching for the **same** reasons he advocates using native **plants**.

"If you have a picture of a landscape, you should be able to tell where the garden is and what season it is by the plants and other garden materials," he said.

One of the local mulches he's partial to is pine needles. They last from three to four years, much longer than other mulches. They do not ...

DATELINE: Redmond, WA, US, Pacific

TEXT:

Paul Lee's restaurant is quiet after the lunch rush. But only blocks away from the House of Hong, construction cranes swing over concrete foundations and steel superstructures - signs of change for Seattle's International District.

Lee welcomes the development, although he worries about the problems that could come with it, such as too many motorists competing for too few parking spaces.

"It will bring more business and more people into this neighborhood," Lee said. "Its going to bring more traffic."

After decades of incremental change, the International District is bracing for a wave of new development. New office buildings near Union Station are expected to bring thousands of workers next door to the neighborhood. Other dever opments inside the district will create new shops, offices and homes.

"Its just incredible," said Lidia Hess, owner of The Copy Co., which has been in business on Sixth Avenue South for 21 years. For the first time, Hess looks out of the company's front window and sees nothing but construction sites, including three cranes.

"We've never had anything like this before," she said.

Most of the district's business people welcome the opportunities that come from new investment in the neighborhood and more people close by. But they also worry that more development will bring construction disruptions, bigger parking problems and soaring rents.

Some wonder whether the unique character of the neighborhood is at risk.

There's kind of an uneasy acceptance right now," said Sue Taoka, executive director of the Seattle Chinatown International District Preservation and Development Authority. "People are hopeful that all of this development will bring positive change."

7/17/02

For years, the International District has been a stable but eclectic mix of ethnic groups: Chinese Americans, Japanese Americans, Vietnamese Americans and others. Roast ducks hang in shop windows, newspapers publish in Chinese and visitors can hear several languages on the same street corner.

But recent events have underscored the sense of impending change. Safeco Field, the new baseball stadium southwest of the district opened July 15. Two days earlier, local officials opened a pedestrian bridge at Weller Street that connects the district with Pioneer Square and the stadium.

More opening ceremonies are on the way. New developments that are either in the district or nearby include:

- \* Union Station. The refurbished train depot on the corner of South Jackson Street and Fourth Avenue South will become the headquarters for Sound Transit Owners Paul Allen and NitzeStagen & Co. are also building an adjacent campus with more than 1 million square feet of office space.

- \* Two sports stadiums. Safeco Field is completed, and a new football stadium will replace the Fingdome, which will be demolished next year.

- \* King County office building. Officials are starting to move into the 10-story office building that was built on a parking lot next to King Street Station.

- \* Uwajimaya. The Moriguchi family is building a complex of shops, market-rate apartments and parking on two blocks between south Weller and Dearborn streets and

Construction cranes are a common site in the International District, where several large commercial, retail and residential projects are under way or planned.

Fifth and Sixth avenues south.

- \* Pacific Rim Center. Paul Ilao is building a complex of shops, apartments and parking at 10th Avenue South and South Jackson Street.
- 9 Fujisada. The Moriguchi family is building the 25-unit condominium with street-level shops on Sixth Avenue

South, just south of South Jackson Street. Buyers have already snapped up 19 residential units, even though the

building won't be completed until this fall.

The new condominium has special significance to the district, where many residents live in low-income apartments and hotel rooms. Fujisada is the district's first market-rate condo, said Nyla Nakano, an associate broker with Windermere Real Estate.

Most businesses in the district see opportunities in the new development, which they believe will bring more consumers into their neighborhood. Already, some businesses are finding ways to reach out to the new office workers. The Chinatown International District Business Improvement Area recently gave discount cards for district merchants to employees at the new Mng County office building. 'Me business group plans to give out more cards to workers who move into the Union Station campus.

Despite a sense of optimism in the district, many also see a downside to the new development.

"This is a double-edged sword," said Felix Y. Liu, a friend of the family that owns Carpet King on Fifth Avenue South, across the street from the Union Station project.

Parking is a perennial topic in the district, and many merchants worry that new development will bring more motorists into their neighborhood. They don't want commuters to take up so many parking spaces that shoppers get discouraged and go elsewhere.

The new developments will provide thousands of additional parking spaces, although some district residents wonder whether even that will be enough. A city parking study, due to come out later this year, may offer some solutions.

Even though many residents welcome the new construction, they wish the development had come in smaller, less disruptive doses. Big projects are now under way simultaneously at Union Station, Uwajimaya and the Pacific Rim Center.

"I think there's too much development, all at once," said Assunta Ng, publisher of the Seattle Chinese Post and other publications. "We're really bombarded."

Merchants also worry about higher rents, as landlords charge more for space because of rising property values

and growing demand for the district's storefronts. Some merchants say their landlords have already raised rents or hinted at future increases.

Higher rents could change the character of the business

district especially because rental rates for storefronts are among the lowest in the city. Big jumps in commercial rents could displace some of the district's oldest merchants.

"We could very easily lose the character and the culture of this community," said Taoka, the director of the district's preservation and development authority.
